the meeting was not so well attended as it might have been. Otherwise it was an excellent meeting

The St. Lawrence Boom and Manufacturing Company, under the management of Messrs. Huntley & Sons are making the last drive of white pine out of Knapps creek and its tributaries. They have about two million feet to drive to Ronceverte. They have been running logs up to the present rain. This company has been taking out the pine on Knapps creek and Greenbrier river for over twenty years and are just finishing this year.

Timber Famine Predicted.

Every person in the United States is using over six times as much wood as he would if he were in Europe. The country as a whole, consumes every year, between three and four times more wood than all of the forests of the United States grew in the mean-time.

These statements are made in a lengthy statement on the lumber crop issued today by the forestry service of the department of agriculture. A timber famine is predicted unless more economic use of lumber is inaugurated and government control is instituted to prevent waste in use to increase the growth of the forest lands.

takes money to carry on this work; so we need not kick about a few dollars tax when we are getting value received.

The Cheat Lumber Co. is building a railroad down Elk river. We hope this will be of great benefit to our people.

L. D. Sharp believes in good sheep. He has had several registered rams shipped to him in the last few years and has just received some registered Oxford down ewes from Illinois that are very fine. It looks as though he would never get the money back he is spending for sheep.
